PROJECTS

Public Cab Service

2023 Moradabad

This is a Project based on the cabs service. This is entitled by PUBLIC CAB SERVICE.In this , we connect the random people with the near by people who give and take the service to each other.Thereare two aspects :- Driver and User.The One who have the car and wants to give lift to someone but due to several(suchas time and value)reason they can't even try to give that service.On the other hand , the people who wants the car service may easily get it and in lesser time as compared to ola ,uber etc.

Chatbot Using Python

2022 Moradabad

Developed a chatbot using Python Libraries like speech recognition, pyqt, pyttsx3,threading and many other libraries are used to develop a chatbot.

This chatbot is basically used for the guidance to new people for the guidance who had visited for the first time in the campus.The user can also asks them by the voice command and search to then place where they want, or them may ask for the contact number of any if the faculty.

- Successfully delivered as a project in our college

Internship website for JSI software Solutions

2023 Moradabad

Developed a Live Internship website for enrolling the students for their internships. In this the student have to register and enroll in thier own preferable courses and we had also given the payment gateway to pay the fees. The records of student will be verified by the admin and afterwards the courses can start.
